

## Om LimeSurvey

LimeSurvey is an open source online survey tool. It is completely free and provides all the basic and advanced functions seen in commercial survey software. You can install LimeSurvey on your own servers (no license fees og user restrictions). The user interface is intuitively designed and offer features such as:

- Invitations by email and follow-up (e.g. import a list of employees)
- Dependent questions
- Assessments
- Full control over survey design and layout
- Unlimited users and suverys (customized access rights)
- Advanced user management
- Basic built-in statistical analysis
- Export results to Excel, SPSS.

We offer you a 3 days free trial where you can try-out and experience the userfriendliness of LimeSurvey hosted on our servers.

## LimeSurvey Courses

A *Superuser* course enables you to setup and administer different types of surveys, use email invitations and various question types.

An *Advanced* course demonstrates how to customize the layout (e.g. company logo and colors), administration of users, database back-up and advanced question types.

All courses are completed in one day and comes with exercises and a learning pack that can be used as a manual for later reference. Courses are held at your work-place (English, Danish and Swedish).

We offer a range of services that enables you to immediately conduct surveys (e.g. organizational surveys, polls and, marketsuverys). Our LimeSurvey services include; LimeSurvey set-up (your servers), hosting of LimeSurvey (a ready-to-use and maintained package hosted on our servers), customization of the survey template (company colors and logo) and ad hoc support.

If you prefer to let us handle all technical work, we can set-up and administer the survey based on your paper or Word draft. You will receive a report with an analysis of your data. Contact us for more information.
